LANGUAGES

English: B2 - TOEIC 920

Spanish: A2

SKILLS

Programming: Python, Java, Bash, JavaScript, C, SQL, R

Web: HTML, CSS, JavaScript

Data / AI: pandas, scikit-learn, RStudio

Cybersecurity: log analysis, Wazuh, Suricata, Wireshark, security best practices

Databases: MariaDB, PostgreSQL, MongoDB

Tools: Linux, Docker, Git, Grafana, Nginx, STM32CubeIDE

INTERESTS

Sports: tennis, walking, boxing

Cinema, video games, music

CERTIFICATIONS

2026: TOEIC 920 - B2

2026: Learning AI through Visualization - Columbia University

2025: CLES B1 English

2025: CNIL certification

2024: SecNumacademie - information security and authentication

PROFILE

Final-year computer engineering student at [ESIROI](#), currently completing an exchange semester at INSA Lyon. My broad profile combines software development, cybersecurity, data, systems and networks. I enjoy understanding how technologies work, analysing problems and building practical solutions. My projects and professional experience have strengthened my technical curiosity, autonomy and teamwork skills.

PROFESSIONAL EXPERIENCE

- 2026 · Junior SOC Analyst - eBuilder Security, Stockholm. Completed internship: security alert monitoring and analysis, first-level incident triage, and participation in day-to-day SOC operations.
- 2025 · Cybersecurity Intern - OCOI. Development of digital tools and participation in cybersecurity events.

EDUCATION

- 2026 - present · Final year of the engineering degree (Master's level) - ESIROI. Exchange semester at INSA Lyon.
- 2023 · Second year of BSc Computer Science - University of La Reunion.
- 2022 · French general baccalaureate, honours - Mathematics and Computer Science, Lycee Marie Curie, Sainte-Anne.

PROJECTS

- SOC design: log collection, monitoring and detection with Wazuh, Suricata and MITRE ATT&CK.
- Infrastructure monitoring: Grafana dashboards for system metrics and business indicators.
- Data mining and Big Data: logistic regression, large-scale data processing and visualisation.
- Systems and networks: dashboard and API for LPWAN data transmitted by STM32 sensors.

COMPETITIONS AND EVENTS

- Big Data & AI Paris 2026: event participant.
- 2025 conference: presented "Ethical and Secure AI Morning", organised by OCOI for professionals in La Reunion.
- Le HACK 2025: participated in the event in Paris.
- Nuit de l'info 2024: 1st team nationwide in the Ubisoft Bordeaux challenge.
- DataCup Challenge 2024: 2nd regional place as a team, in partnership with ATMO Reunion.
